What, if any, comments do you have on the proposals for Specialist Surgical Centres outside London

Our respondents have told us that they feel it is essential that the Freeman hospital in Newcastle is included in the final plans for specialist surgical centres. As one of the two transplant centres with an excellent wealth of skills and experience within their team and their excellent record of quality outcomes it would not make sense to proceed with any of the option that did not include the Freeman. Some respondents have also made the point that the Freeman also offers a service to those in the Scottish borders, which should also be taken into account.
